Investigation Outcome

The Resources Regulator (**Regulator**), within the Department of Primary Industries and Regional Development, has completed an investigation of complaints raised by you relating to exploration activities undertaken by RZ Resources Pty Ltd (**RZ**) on land relevant to *Mining Act 1992* exploration licences 9496 and 8312 within Warwick Station from early February 2025 to 25 June 2025. The complaint details and reference numbers are summarised briefly below.

- NCG0006497 (your reference AREQ0063030): dust and noise impacts and alleged non-compliances with approved assessable prospecting operations (**APOs**)
- NCG0006526 (your reference AREQ0063751): alleged lack of community consultation and non-compliance with its APOs and the *Exploration Code of Practice: Community Consultation* (version 2.1, May 2023)
- NCG0006527 (your reference AREQ0063750): alleged non-compliance with APOs with respect to spoil pits, and topsoil and subsoil management

The Regulator consulted with RZ to establish the dates, locations and nature of activities being undertaken, and to obtain relevant documentary information such as its community consultation strategy. Coupled with known outcomes from an audit of exploration activities within approved areas under exploration licences 9496 and 8312 on Warwick Station undertaken by the Regulator on 13 May 2025, the investigation has not identified any non-compliances with mandatory requirements of exploration codes of practice or the conditions of approved APOs.

As a result, the Regulator does not intend to take any further action in relation to these matters.

RZ is known to have a complaint management procedure in order to comply with its community and stakeholder engagement plan and relevant requirements of exploration codes of practice. RZ is required to prepare annual community consultation reports documenting feedback and complaints received.

The Regulator encourages you to use existing communication methods with RZ available on its website at [Contact - RZ Resources](#) should you have concerns about its exploration activities in the future.

Please contact Alex Bowlay on _____ or via email
should you have any concerns.

Yours sincerely,
