

**INQUIRY INTO DINGOES IN NATIONAL PARKS IN NEW
SOUTH WALES**

Name: Name suppressed

Date Received: 23 June 2026

Partially
Confidential

I am completing this submission as it is my given right to protect the voiceless, this case the dingoes. Dingoes deserve FULL protection Under the NSW law.

The fact that these beautiful beings are still being baited with 1080, being trapped and shot is beyond comprehension.

Dingoes play a VITAL role in the ecosystem, removing them from it is not only DIABOLICAL, but creates a domino effect that WILL alter the entire food web.

I recently encountered 3 Dingo puppies, left alone, orphaned if you will because of the use of 1080. How dare humans think they have the right to do that to innocent babies.

I am a NSW resident and I am extremely concerned about the treatment of Dingoes in national parks they deserve PROTECTION under NSW law, the current approach is inhumane and lacks the compassion they deserve.

Dingoes are sentient animals meaning they have the capacity to feel things such as PAIN, pleasure, joy and FEAR. The cruelty they are enduring with the use of 1080 poisoning, trapping and shooting is unjustifiable and I URGE the committee to recommend FULL legislative protections for dingoes as well as the immediate move away from all HARMFUL and LETHAL control methods.

The current approach to dingo management is outdated in such a "modern" society we claim to be, I urge the committee to recommend the lethal practices be replaced with HUMANE, NON-LETHAL alternatives that allow ALL dingoes to exist safely within national parks.

The committee needs to rethink their current approach before you ruin an entire ecosystem; Dingoes deserve so much better and we will not stop fighting until the use of poisoning, trapping and shooting comes to an end. We plead that dingoes have FULL protection under the NSW law, find it in your heart.
