INQUIRY INTO DINGOES IN NATIONAL PARKS IN NEW SOUTH WALES

Name: Mrs Deborah Dabrowski

Date Received: 18 June 2026

Subject: DINGOES in NSW NATIONAL PARKS

I would like to add my voice to the plight of the Dingoes in this country and in particular NSW.

Dingoes should at least be included in the Biodiversity Conservation Act that protects other Australian wildlife. They should not be classified with the feral animals. Dingoes play a significant role in the wild and help with control of actual feral animals.

Not that those laws seem to go far enough to prevent the ongoing demise of many native animals in favour of big business, logging and housing developments etc, causing habitat loss and leading to Australia having the unenviable record of having highest extinction rate in the world.

The cruelty to Dingoes through trapping, shooting and poisoning is not acceptable and there should be an end to killing Dingoes in our NSW National Parks.

First Nations people should be involved in the management and protection of Dingoes and non-lethal coexistence programs for lands around the parks should be introduced and funded.

Surely, we can do better for all the animals in Australia including the Dingoes.

Thank you

Debbie Dabrowski
